Online Supplemental Material

Email text:
We are conducting a research survey to gauge interest in clinical decision support tools for glaucoma.

Clinical decision support tools are computer programs designed to assist clinicians as they make decisions for patient care. These tools can be integrated into Electronic Medical Records and can provide information to help with clinical decision making.

An example is an electronic health record add-on app that was developed to help with neonatal bilirubin management. For neonatal bilirubin management without the add-on app, clinicians must retrieve data that is scattered across the medical record, synthesize the data, and apply guideline algorithms to develop patient-specific treatment plans. The clinical decision support tool gathers the data into one display and provides guideline-based treatment recommendations. (See attached image for an example display.)

Please follow this link to complete the survey: http://j.mp/2VSZpVF
The survey should take 2-3 minutes to complete and will be completely anonymous.

Your participation is completely voluntary. You may choose not to answer a question or are free to discontinue participation in the survey at any time for any reason without penalty or loss of benefits. There are no known risks associated with participating in this survey. You may experience a benefit in the form of increased insight and awareness into your clinical practices and support needs.

By participating in the survey, you are giving your consent to participate in this research. Thank you for your willingness to participate!
Survey about Clinical Decision Support for Glaucoma

Please complete the survey below. Your responses will be anonymous.

Thank you!

1) Would you be interested in using a clinical decision support tool for glaucoma?
   ○ Definitely   ○ Probably   ○ Probably not   ○ Definitely not

Do you think the following characteristics of clinical decision support tools would be important for you in clinical practice?

<table>
<thead>
<tr>
<th></th>
<th>Very important</th>
<th>Moderately important</th>
<th>Slightly important</th>
<th>Unimportant</th>
</tr>
</thead>
<tbody>
<tr>
<td>2) The tool is integrated into my clinic workflow</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>3) The tool integrates with my current Electronic Medical Record</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>4) I don't have to remember to use it, the results are just provided to me</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>5) I don't have to enter any data manually, the data is entered into the tool automatically</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>6) The tool interface is easy to use</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>7) Using the tool requires minimal time</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
</tbody>
</table>

Do you think each of the following patient care decisions would benefit from a clinical decision support tool that fulfills the important characteristics listed above?

<table>
<thead>
<tr>
<th></th>
<th>Definitely</th>
<th>Probably</th>
<th>Probably not</th>
<th>Definitely not</th>
</tr>
</thead>
<tbody>
<tr>
<td>8) Increasing certainty when first diagnosing a patient with glaucoma</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>9) Determining the optimal time for the next follow-up testing for patients with glaucoma</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>10) Increasing certainty when identifying progression of glaucoma</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>11) Increasing certainty when deciding whether or not to intensify glaucoma treatment</td>
<td>○</td>
<td>○</td>
<td>○</td>
<td>○</td>
</tr>
<tr>
<td>12)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Confidential

Increasing certainty when choosing the next treatment step (additional medication, laser, etc.)

13) What is your age?

- [ ] 20-29
- [ ] 30-39
- [ ] 40-49
- [ ] 50-59
- [ ] 60+

14) How do you identify yourself?

- [ ] Female
- [ ] Male
- [ ] Other

15) How do you identify yourself? [choose all that apply]

- [ ] American Indian
- [ ] Asian
- [ ] Black
- [ ] Hispanic
- [ ] Other
- [ ] White

16) How many years have you been in practice?

- [ ] 0-5
- [ ] 6-10
- [ ] 11-15
- [ ] 16-20
- [ ] 21+

17) Which best describes your practice setting?

- [ ] Private practice - Small Group (≤ 4 providers)
- [ ] Multi-specialty clinic / Health System
- [ ] Academic
- [ ] Other

18) What is your specialty?

- [ ] Optometrist
- [ ] Ophthalmologist: glaucoma specialist
- [ ] Ophthalmologist: non-glaucoma specialist

19) How many patients do you see in a typical clinic day?

- [ ] 0-20
- [ ] 21-40
- [ ] 41-60
- [ ] 60+

20) What percent of the patients you see have glaucoma?

- [ ] 0%-25%
- [ ] 26%-50%
- [ ] 51%-75%
- [ ] 76%-100%

21) Are any of the following routinely involved in your clinic? [choose all that apply]

- [ ] Scribes
- [ ] Students
- [ ] Residents
- [ ] Fellows
- [ ] None
A Patient with hyperbilirubinemia

B Patient with projected hyperbilirubinemia
