

Figure S1. Median daily illuminance exposure level (panel A), time spent in indoor (<1000 lux) and outdoor (≥ 1000 lux) light conditions (Panel B), and epochs in outdoor light conditions (panel C) in myopic and non-myopic children during before school, school, and after school hours (left hand column), and class time, break time and transition time (right hand column). * and ** represent statistical significance at the level of $P < 0.05$ and $P \leq 0.01$, respectively.
