

Supplementary Figure 1. Associations of WWI (quintiles) with VI. Model 1: adjusted for demographic factors, including age and gender; Model 2: adjusted for factors in Model 1, as well as social-economic, including marital status, educational level and living area; Model 3: adjusted for factors in Model 2, as well as lifestyle factors including smoking status and alcohol consumption; Model 4: adjusted for factors in Model 3, as well as medical insurance covering; Model 5: adjusted for factors in Model 4, as well as BMI. The test for linear trend was based on a variable containing the median value of each quintile of WWI.
