

Supplementary Table 1. Bacterial keratitis severity, anterior chamber reaction and corneal haze scoring criteria

<b>BK Severity*</b>	<b>Grade</b>	<b>AC Reaction</b>	<b>Grade</b>	<b>Corneal Haze</b>	<b>Grade</b>
None	0	None	0	No corneal haze	0
0 < X < 1 mm	1	<20 cells	1	Iris details visible	1
1 ≤ X < 2 mm	2	>20 cells	2	Pupillary margin visible; iris details not visible	2
2 ≤ X < 4 mm	3	Hypopyon	3	Pupillary margin not visible	3
4 ≤ X ≤ 8 mm	4	-	-	Entirely opaque cornea	4
X > 8 mm	5				

Abbreviations: AC, Anterior chamber; BK, Bacterial keratitis. \*Based on the average infiltration and epithelial defect size
