

Supplemental Table 1. Multiple Linear Regression Analysis of Association between Factors and Intraocular Pressure Reduction at 12 Months.

Parameter	Beta	Lower 95% CI	Upper 95% CI	P value
Univariate linear regression				
Preoperative IOP	2.81	0.463	2.516	0.005
IOP reduction at 3 months	0.445	0.257	0.627	<0.001
MD	0.064	-0.363	0.685	0.544
Total energy of SLT	-0.040	-0.123	0.083	0.702
CCT	-0.226	-0.138	-0.007	0.029
Preoperative medication	-0.196	-8.962	0.188	0.060
Multivariate linear regression				
Preoperative IOP	0.269	0.365	2.403	0.008
IOP reduction at 3 months	0.353	0.162	0.538	<0.001
MD	-0.009	-0.484	0.439	0.923
Total energy of SLT	-0.119	-0.150	0.031	0.196
CCT	-0.259	-0.144	-0.023	0.008

IOP=intraocular pressure; CI=confidence interval; MD=mean deviation; SLT=selective laser trabeculoplasty; CCT=central corneal thickness.
