Appendix 3

AGREE II items used for appraisal of clinical practice guidelines

AGREE II Section	Statement
4	The guideline development group includes individuals from all relevant professional groups.
7	Systematic methods were used to search for evidence.
8	The criteria for selecting the evidence are clearly described.
10	The methods for formulating the recommendations are clearly described.
12	There is an explicit link between the recommendations and the supporting evidence.
13	The guideline has been externally reviewed by experts prior to its publication.
15	The recommendations are specific and unambiguous.
22	The views of the funding body have not influenced the content of the guideline.
23	Competing interests of guideline development group members have been recorded and addressed.
